SERVICE driven by PASSION

At Hennco, we are driven by our passion for waterjet and helping customers get the most out of their equipment. Our passion bleeds into everything we do; like getting a rush order out the door so you can get back up and running the next day, to walking you through what parts are needed for a rebuild.

We understand you have a choice, which is why we choose to show you our commitment to your satisfaction in everything we do.

PRECISIONCORE™

HENNCO'S BRAND OF PERFORMANCE UPGRADES

ABRASIVE NOZZLES

Upgrading your abrasive waterjet nozzle is one of the fastest and easiest ways to enhance your waterjet's performance and save money. Hennco offers two grades of PrecisionCore Nozzles: the economy RT-20 and the premium DT-30.

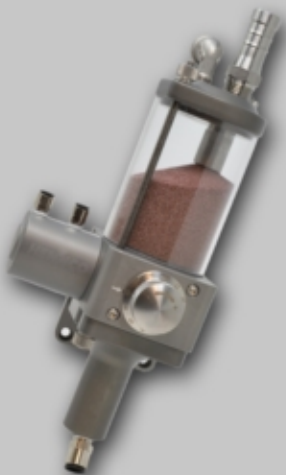

PrecisionCore nozzles are made from advanced materials without soft binders. Special processing of the nozzles yields extra fine grain sizes producing superior wear resistant nozzles. The result is a nozzle specifically formulated to resist the abrasive and erosion wear of abrasive waterjet cutting.

ABRASIVE CUTTING HEADS

Every Brand of Waterjet can benefit from PrecisionCore Cutting Head Technology.

At Hennco we understand waterjet cutting applications and machines can be different, especially in a job shop environment where you never know what kind of work will come in the door next. This is why Hennco offers **5 different PrecisionCore Cutting Heads**, with each being fully customizable based on the application and machine type.

From Diamond to Ruby orifices or even the new TetraCore orifices, we have a cutting head designed for every application and budget.

ABRASIVE METERING

Save Money on Abrasive!

Abrasive is the largest operating expense in abrasive waterjet cutting. Optimizing abrasive usage is key to increasing the profitability of your waterjet operation. The accuracy and versatility of the PrecisionCore AMD improves the cutting process and avoids waste by precisely delivering abrasive to the cutting head. With 30 settings, which can easily be dialed in, the right amount of abrasive is consistently delivered to the cutting head.

The AMD comes in two different models: air to open/air to close and air to open/spring to close. Multiple mounting kits are available for all the major brands of waterjet equipment ensuring easy installation.
